Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 9-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Figures 2 and 9 of Ollmar (5,353,802).

Claims 9-12 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Figures 1 and 6 of Schmid (4,448,199).

Claims 9-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Figure 1 of Tarjan et al (6,091,977).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ollmar (5,353,802) in view of Severinghaus (3,750,649). Ollmar fails to disclose the electrodes being made of separate parts. Severinghaus discloses a similar electrode made of separate parts (see Figures 2 and 3). Given this teaching, it would have been obvious to form the electrodes in Ollmar of such parts to effect superior skin contact.

Art Unit: 3739

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ollmar (5,353,802) in view of Schmid (4,448,199). Ollmar fails to disclose the sensor being in a watch-type case. Ollmar does disclose use of the sensor on the skin. Schmid discloses such a case for placement on the skin. Given this teaching, it would have been obvious to form the sensor in Ollmar in a case to effect superior skin placement.

Allowable Subject Matter

Claims 7, 8, 13, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The other cited art discloses similar electrodes.
